

## Mix of Various Genres

You must choose 3 songs from contrasting genres. They cannot be from the popular, 'top 40' music that you are exposed to on a regular basis. You need to use songs that you are unfamiliar with. The songs must have a commonality that links them together.

The commonality could be a rhythmical phrase, a melodic motif, a harmonic pattern or lyrical content.

The songs must be all close in tempo and volume.

You are responsible for finding the songs and put them into digital form. You will then make a mix of the songs using fades.

### **Written Section**

For each song you must list the songs in order of the mix including the following information:

Artist(s)  
Composer/Lyricist  
Producer/Engineer  
Recorded at which studio  
When it was recorded or released  
Record Label

Then include an explanation of how these three songs are related and what genre they are each from.
